

## Quality International Trophy in the Veleco's hands for the third time in a row

It couldn't have gone any other way – the third nomination in a row for the Quality International Program ended up being the best we could have dreamed of! Veleco – luxury medical devices manufacturer, has once again been awarded the most valuable badge, to confirm the highest quality. This time, **Veleco GRAVIS model has won the Quality International Trophy!**

### Veleco's successes in the Quality International Program

With the achievement of a set of three Quality International awards – in 2022 for the **GRAVIS** model, in 2021 for **FASTER mobility scooter** and in 2020 for the **DRACO** model, Vececo is becoming an increasingly recognized brand on the European market and especially in the UK. Continuous growth, superior product quality, an ever-growing base of satisfied customers and professional appreciation of product quality and customer service puts us at the forefront of the **fastest-growing** and high quality companies.

### What is the Quality International?

This is an international project which aims to recognize and promote institutions that represent the highest standards of customer service and products. The third Quality International Trophy complements the awards confirming the quality of our products with a third, and this time the most valuable award. But there is more. With the Highest Quality International Trophy, **Veleco received the prestigious Pear QI statuette**. This statuette will always remind both – us and our customers – of **Veleco's importance on the global market**. It is also a proof of the validity of our strategy, the appropriate quality policy and our positive image against the competition.

### We do not sit on our accolades – the best is yet to come

We continue to improve our products and expand our range. The relocation of the company's headquarters and the creation of a modern complex has allowed us to expand our activities and optimize our processes. Our network of distributors continues to grow. **Veleco mobility scooters are available in European countries** and the UK market. We are convinced that the best years of our growth are still ahead of us. We trust that we will soon be able to boast of further, equally valuable achievements.
