

Kangoo Plus

The twin stroller

Mobility, excellence, and adaptability

With our twin rehabilitation buggy, you can cherish your special moments together without concern. This buggy provides individual support for both children, ensuring that neither has to compromise. Whether you're taking a stroll in the park or heading into town, both seat units are positioned side by side and can be adjusted independently. Allowing each child to explore the world safely and comfortably.

The Kangoo Plus is remarkable not only for its emotional appeal but also for its advanced technology. The customizable seat units are designed to meet the specific needs of each child and can be adjusted as they grow. Despite its dimensions, the buggy can be folded into a compact form, making it perfect for car transport or home storage. Additionally, its slim profile allows it to pass through wheelchair-accessible doors with ease. This ensures that you can maintain flexibility and mobility at all times without sacrificing comfort or functionality.
